More than the latest technology.

Customize restorations on-demand.

STRAUMANN® CARES® SCAN & SHAPE ONLINE

Dental laboratories are facing tremendous pressure from restorative dentists to deliver customized restorations faster while keeping costs low. The rapid expansion of off-shore laboratories has put US dental laboratories that pride themselves on high-quality care in a defensive position to lower costs while still maintaining quality on every case.

Many labs and restorative dentists aren't aware of the long-term ramifications that choosing low cost, non-original products can have. What is the cost of a re-make when there is a failure? The patient suffers as the procedure has just become quite costly in terms of investment of time, patient satisfaction decreases, and ultimately the referral may lose the patient.

Educating your market on the importance of quality, original components and the long-term costs of choosing inferior products, places you in a leadership position within your market and lets you continue to promote your laboratory as a quality leader. **Straumann CARES Scan & Shape Online** provides you the ability to deliver original Straumann prosthetics with a 100% guarantee fit of components without any new technology investments that would detract from your bottom line.

THE PARTNER OF CHOICE

For both Soft Tissue Level and Bone Level Implants, Straumann offers a broad range of CARES® CAD/CAM prosthetics in leading materials and a full application range – designed to create the optimal restorative result for virtually any case. Our certified dental technicians are here to assist you with their expertise in computer-aided design restorations.

A SIMPLE PROCEDURE

You do not need any special digital scanner equipment or software. Just simply create models or wax-ups, and let us take care of it.

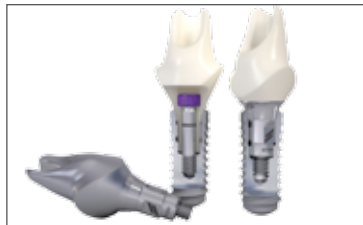

A PERFECT FIT FOR ALL NEEDS

We offer a wide range of solutions and materials for you to choose from. There is no need for you to look anywhere else.

CARES X-Stream™: One-step prosthetic solution: One scan, one design, one delivery.

CARES Abutments: Cement-retained or screw-retained restorative options.

CARES Screw-Retained Bridges and Bars:** One solution for fixed edentulous cases.

CARES Abutment, TAN*: Titanium alloy developed especially for direct veneering.

* Pending FDA clearance

** Online ordering coming soon. Please call 866/531 7365 for your SRBB order form today!
