

**YOUR DENTIST WILL CONSULT WITH YOU TO UNDERSTAND YOUR NEEDS AND FIND THE RIGHT OPTIONS**

For some patients, your dentist may recommend a bone graft to increase the amount of bone available that may help to provide stability to your dental implants. Advanced technology like Straumann's Roxolid® implants with SLActive® surface are designed to potentially reduce the need for traditional bone grafting, resulting in the possibility to place a smaller, less intrusive implant and shorter treatment times. Typically, full-arch restorations supported by 4–6 implants result in less cost than alternative treatments that require a greater number of implants.

Patients are often concerned about the possibility of being without teeth during initial treatment phases. According to the needs of each individual case, provisional or temporary teeth can be delivered on the day of surgery or soon afterwards allowing you to get back to your routine quickly. Only your dentist can decide if temporary or provisional teeth are suitable for you.

After the healing phase, the final delivery of your new implant supported dental bridge enables you to enjoy a better quality of life every day, ranging from the simple joy of eating your favorite foods again, to the satisfaction of smiling without hesitation.

ABOUT **STRAUMANN®**

A worldwide leader in dental implants, Straumann is the only company with a complete portfolio of surgical, restorative, oral tissue and bone regeneration, and digital dentistry solutions. From root to crown, Straumann solutions are supported by rigorous scientific and clinical evidence and a commitment to quality.

Since every surgical procedure carries potential risks, patients should always consult a dental professional to evaluate whether dental implants are the option for them.

**FULL-ARCH RESTORATIONS**

A beautifully effective solution  
for all your missing teeth

A BEAUTIFULLY EFFECTIVE **SOLUTION**  
FOR ALL YOUR MISSING TEETH

**A STRAUMANN FULL-ARCH RESTORATION SOLUTION HAS MANY BENEFITS BEYOND TRADITIONAL DENTURES**

For patients missing all of their natural teeth, traditional gum-supported dentures used to be the only solution. However, these patients with gum supported dentures sometimes reported instability, loss of confidence, and difficulties with eating and enjoying the foods they love.

A Straumann Full-Arch Restoration offers a beautifully effective solution that can **improve your smile, enhance confidence and restore function.**

A Straumann Full-Arch Restoration replaces your missing teeth in the upper or lower jaw with a full-arch dental bridge that is supported by dental implants. The implants provide a secure anchor for the bridge and teeth, with a stable connection to the jaw bone allowing them to function like healthy natural teeth in most cases. This solution can be cost effective, natural-looking, and provides a substantial improvement in function compared to a traditional gum-supported denture. Additionally, dental implants replace the lost tooth roots, which can help to preserve bone and facial structure today and in the future.

STRAUMANN **DENTAL IMPLANTS** OFFER A WORLD OF TREATMENT OPTIONS

**YOUR DENTIST CAN WORK WITH YOU TO DECIDE IF FIXED OR REMOVABLE TEETH WITH A STRAUMANN FULL-ARCH DENTAL RESTORATION ARE THE RIGHT FIT FOR YOUR CASE.**

**FIXED**

A Bridge of artificial teeth is securely screwed into place and can be removed only by your dentist. This is the most secure and durable treatment type.

**COMPLETE UPPER JAW**

**COMPLETE LOWER JAW**

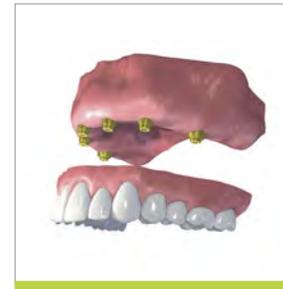

**REMOVABLE**

A snap-in connection between the implants and bridge allows for removal by the patient and easy cleaning.

**COMPLETE UPPER JAW**

**COMPLETE LOWER JAW**

**A STRAUMANN FULL-ARCH RESTORATION MAY BE RIGHT FOR YOU. ASK YOUR DENTIST TO EXPLAIN MORE ABOUT BEAUTIFULLY EFFECTIVE SOLUTIONS THAT RESTORE YOUR QUALITY OF LIFE THROUGH DENTAL IMPLANTS.**
