

THE STRAUMANN RESTORATION

The Quality Dentists Trust

COMMITTED TO
SIMPLY DOING MORE
FOR DENTAL PROFESSIONALS

THE STRAUMANN RESTORATION – THE QUALITY DENTISTS TRUST

Today's economy presents hardships for the dental professional. The rising cost of gold and manual laboratory tasks make pricing services and turning a profit challenging for your dental practice.

The Straumann Restoration is a natural solution for your implant and conventional dental restorations. Technicians have the option to restore all Straumann implants with stock or customized abutments as well as conventional dental restorations, saving everyone time, money and helping to ensure a precise fit. Our high-quality materials for copings, frameworks and customized abutments help you create best-in-class restorations.

Talk with your local Straumann CAD/CAM laboratory for pricing options to fit your needs.

Tissue Level Options

Titanium Abutment

ZrO₂ Abutment

Bone Level Options

Titanium Abutment

ZrO₂ Abutment

*Straumann reduces
a dental technician's manual labor
so you can focus
on becoming more profitable
and growing your business.*

Receive Straumann quality on your very next case.

MAKE THE CONNECTION

Enjoy restorative solutions from a quality-centric premium company. Confidently restore your patient's esthetics with the reliability and precision of a company that's been in the dental industry for over 30 years. Use Straumann to provide your patients the natural-looking result they desire and ease of mind. Request the Straumann Restoration on your next case and enjoy the same quality that's defined our implants and abutments for decades.

Straumann CAD/CAM Solutions provide digital prosthetic technology that allows you to create a precise fit for copings, bridges and abutments time after time.

A RANGE OF HIGH QUALITY MATERIALS TO MEET YOUR NEEDS

Breadth and strength help to differentiate your practice

An array of copings and frameworks produced in the U.S. – zirconia, titanium, cobalt-chromium, and our PMMA material – are designed to provide patients with the esthetic and functional results they desire and help eliminate additional charges for high noble alloy.

The industry is relying more heavily on ceramic for prosthetic solutions

because it is strong, cost-effective, and provides a beautiful, natural esthetic restoration.

- Single crowns to 14-unit bridges
- 100% Metal-free
- Available in multiple shades

Titanium is used in many industries

for its strength and light weight.

- Single crowns to 14-unit bridges
- Grade 2 titanium

Cobalt-Chromium (CoCr) is a non-precious, low-cost alternative

to create individual crowns and multi-tooth bridges.

- Single crowns to 14-unit bridges
- Optimal for laser welding

Polycon™ ae is a PMMA material

used in the fabrication of temporary crowns and bridges.

- Create full-contour temporary restorations
- Crowns and bridges (more than 1 pontic is not recommended)
