

More than customized restorations. Your on-demand outsourcing service.

The North American dental implant market will expand to reach a value of nearly \$2.7 billion in 2022, compared to just over \$1.1 billion in 2013.¹ That presents tremendous growth potential for dental laboratories restoring dental implants. Does your 3, 5 and 10 year business plan accommodate for this influx of dental implant cases? What sort of staffing adjustments do you need to make? What's the cost of acquiring new infrastructure to scan & design these new cases?

Growing your business shouldn't mean you need to double the size of your staff or find larger office space. Free your staff's time for other in-lab activities and let us do the work. **Straumann® CARES® Scan & Shape** is the laboratory's outsourcing service for Straumann screw-retained bars and bridges and customized abutments. Whether you're expanding your business or you have an existing staff member out for an extended period of time, we're open 24/7 so you don't have to be. With a full staff of CDTs, Scan & Shape is a seamless extension of your dental laboratory.

WHY CARES SCAN & SHAPE?

- Experienced CDTs manage every case
- Expert CDTs dedicated to SRBB cases, which can be quite labor-intensive
- Collaboration with CDTs to review, edit and approve orders
- Online ordering for CARES® Abutments: 24/7 accessibility
- Products offered: CARES Abutments, CARES® Screw-Retained Bars and Bridges, and CARES® X-Stream™, the one-step final restoration

"I have utilized the Scan & Shape service since its introduction by Straumann. I have found it quick, reliable and profitable. The ability to preview the case prior to production virtually assures that you will receive the abutment you require."

— Doug Bean, Finesse Dental Lab, West Barnstable, MA

TURNAROUND TIMES*

(in-house business days) – Abutment & SRBB Cases

Titanium	Zirconia	SRBB
1	3	5

¹ Millennium Report, Dental Implants and Final Abutments, North America 2014. Page 7.
