DID YOU KNOW that **Roxolid** and **SLActive** each received the **Frost & Sullivan Medical Device Technology of the Year Award**? This award, which recognizes excellence in technological innovation, is one of the Best Practices Awards bestowed by Frost & Sullivan, the global growth consulting company. In 2005, SLActive was noted as a 'next generation dental implant surface technology' and in 2009, Roxolid was noted as an 'innovative high performance material for dental implants'.

COMMITTED TO
SIMPLY DOING MORE™
FOR DENTAL PROFESSIONALS

HOW MANY PATIENTS DO YOU HAVE WHO:

- Refuse implants due to grafting procedures, time and cost?
- Are more readily accepting implant treatment and would benefit from today's advanced technology?

Fig. 1: Healthy 18 year old female with congenitally missing lateral incisor. Orthodontics was necessary to correct severe root convergence of adjacent teeth.

Fig. 2: Temporary abutment and provisional restoration in place 6 weeks after implant placement for "provisional guided tissue conditioning".

Fig. 3: Delivery of final abutment to 35Ncm.

Fig. 4: Final Restoration in place.

Fig. 5: 26 month post-op radiograph noting no change in bone levels and stable implant/abutment connection.

ROXOLID® FOR ALL IS DESIGNED TO ALLOW FOR:

- Treatment of more patients through the options available
- Less complex treatment plans, fewer procedures and shorter treatment times
- A higher rate of patient case acceptance
- Increased confidence of the entire implant team – surgeon, restorative doctor, auxiliary and lab
