

Why Join a Spear Study Club?

Hands-on learning in small groups of peers is a proven way to master new clinical skills and build confidence.

Grow Practice Profitability

The key to profitability is already in your practice: your patients. Through interdisciplinary collaboration, Spear Study Club members increase practice profitability by treating more complex cases of higher value.

Improve Clinical Expertise

Learning together with modules based on real cases specifically designed for small-group, hands-on learning, you'll grow in a supportive, interdisciplinary environment. You will treat more cases in your own practice, and see your patients thrive under a higher level of care.

Collaborate With Colleagues

Clubs of eight to 12 specialists, GPs and lab technicians meet six to eight times per year. You'll build an interdisciplinary network in your own community that you can count on for camaraderie, support and referrals.

Increase Case Acceptance

Improve case acceptance by sharing the possibilities of treatment rather than just presenting a treatment plan. Specialist and GP members have reported a significant increase in accepted cases. You'll also empower your team with the tools to initiate conversations with patients about treatment options.

Build a Professional Network

Grow a network of trusted, successful colleagues, increasing the frequency and caliber of referrals. Mentor peers to raise the standard of patient care in your community. Enjoy the fellowship of clinicians who share your passion for great dentistry.

Strengthen Your Team

Get your entire team on the same page with Spear Online's Staff Training resources. Manage staff, implement structured team meetings and create a practice focused on exceptional patient care. As you improve the clinical and non-clinical skills of your staff, you'll boost the daily value of your practice.

Spear Study Clubs Facilitate Practice growth and profitability.

SPEAR
STUDY CLUB

Spear Study Clubs help specialists and general practitioners excel in an all-inclusive, easy-to-run model, integrating evidence-based clinical instruction and online education. With learning modules based on real-life cases, you'll grow through small-group learning in an environment of collaboration and trust.

Study Club Membership Includes:

+ Guided Learning Meetings

Your group of eight to 12 members sets its own pace with Spear's interdisciplinary and practice-development learning modules, which incorporate guided-discussion videos and clinical resources. You'll enjoy collaborative learning in your own community and earn 3 CE credits for every meeting. Modules are created and led by our prestigious faculty, including Drs. Frank Spear, Gregory Kinzer and Steve Ratcliff.

+ SPEAR Online

Spear Online's proven platform includes on-demand access to our extensive clinical and practice curriculum. Resources include:

Course Library

Our ever-expanding curriculum includes CE-eligible clinical and practice management lessons

Staff Training

Get your entire team on the same page with CE-eligible clinical and practice lessons designed to challenge and empower

Patient Education

Resources for diversifying your skills and gaining the confidence to treat larger, more complex cases

Spear TALK

Post a question; you're connected to a forum of peers who have answers

+ SPEAR Seminar

As a group, your club will attend a 2-day Spear seminar (worth 15 CE credits) at the Spear Campus or any of our off site locations in Scottsdale, Ariz.

+ Your Own Dedicated Advisor

Concierge-level support from a dedicated Study Club Advisor, who consistently monitors your club and guides you to greater participation, collaboration and success.

+ Dedicated Study Club Website

Your club has its own password-protected website. Order modules and Learning Pathways, share club-specific news, track CE credits and more.
